

We're the Leader in ERP and Data Integrations

Lease Harbor pioneered the concept of ERP integration in the lease administration and accounting space in the early 2000s and continues to be the industry leader. We have been doing client ERP integrations longer than the majority of our competitors have been in business.

Two decades and hundreds of client ERP system integrations later, we have successfully integrated with all major ERP systems, including Oracle, SAP, Costpoint, PeopleSoft, Great Plains, Workday, NetSuite, Sage, Microsoft Dynamics, JD Edwards, Lawson, and MRI.

Lease Harbor offers the most complete and flexible tools for use with client ERP systems. Our out-of-the-box functionality includes pre-built integration tools for clients with basic requirements and rapid, low-cost customized integrations dictated by client requirements.

Our system's built-in integration features are included with your Lease Harbor subscription. This means you don't need to pay additional fees to use them, unlike many other vendors that charge for each feature as an add-on. These built-in features save you time and money.

Exports

- Standard journal entry formats
- Standard AP/AR export formats
- Business intelligence/data warehouse
- Data and Document backup
- Electronic formats for custom reporting and ad hoc data analysis

Scheduler

- Scheduled email delivery of any export
- Scheduled secure file transfer of any export

Imports

- Comprehensive bulk import/update features allow mass data uploads throughout the entire system, including key dates, expenses, allocations, vendors, exchange rates, apply checks to invoices, and sales
- Upload/update data in bulk for all company-specific custom fields that exist within your portfolio

Web Services

- Automate common recurring tasks such as data imports, data exports, and reports
- Easy to understand documentation and sample code provided to streamline web service setup

If your existing lease accounting software is missing some of these critical integration features, or if you are beginning the process of finding a complete lease accounting software solution for your company, please reach out to Lease Harbor, the leader in ERP and data integrations for over 21 years, at info@leaseharbor.com.

About Lease Harbor LLC

Lease Harbor was founded in March 2000 with the express purpose of building the most complete, user friendly, cost-effective lease administration and lease accounting system. Over the past twenty years, more than 1,800 companies have trusted Lease Harbor's 100% web-based system. We have unrivaled client retention, averaging over ten years. Our global clients range from small companies to large enterprises representing all industries.

As an employee-owned company, our clients continue to rely on our experience, consistency and unrelenting innovation. We offer scalable, reliable, well supported software and an equally important cost-effective pricing model. Apex, Lease Harbor's flagship product, is the industry's first and only full-featured, completely integrated lease administration and lease accounting system.

Lease Harbor provides the industry-leading software and services you need to take control of your lease management and accounting. For a consultative demonstration of the only fully functional lease accounting system in the marketplace, please contact info@leaseharbor.com.
